DAGIM DANIEL

OBJECTIVE

I am a graduate in Electrical Engineering with a strong passion for computers. My major was in Computer Engineering, and I have experience in developing software applications utilizing various programming tools. While I have a preference for web development, I also have familiarity with mobile development and intend to broaden my experience in the future. I am a quick learner, committed to accomplishing the goals or tasks I undertake, and I aspire to grow and enhance my knowledge by applying my skills to real-world challenges.
